4X LIFE IN REBAR*

*vs. 2 cutter drill bit in concrete

At MILWAUKEE®, we strive to do things better. To make life easier in the toughest working conditions. We pour our energy into the relentless improvement of our products, and even the most minor improvements begin with understanding the challenges of the jobsite.

This intrinsic understanding of the challenge has led to the creation of our next generation MX4™, a game-changer in drill bit technology. Solid carbide construction means longer life, Target Tip Technology and a shaper angled tip means greater accuracy and next level speed in drilling through the toughest materials.

MX4™ is the benchmark in SDS-Plus and SDS-Max drill bits.
Because at MILWAUKEE®, every bit matters.

NEW TARGET TIP TECHNOLOGY

IMPROVED PERFORMANCE ON REBAR

SDS-Plus MX4 drill bits - 4 cut

Symmetrical 4 cutter geometry (4 x 90°). Perfect round holes for optimal anchor fitting. New sharper angled tip design for easy spot drilling with pinpoint accuracy and increased performance on rebar. One piece solid full welded carbide tip on 5-10 mm and one piece slotted carbide tip on 12-32 mm for best lifetime. 4 flute geometry: The high volume 4 flute geometry ensures the optimum removal of dust and debris. PGM rated. Made in Germany.

DRILLING APPLICATIONS
WITH CORDLESS HAMMERS

SDS-Plus M2 drill bits - 2 cut

Made in Germany

FASTEST: New aggressive tip geometry with 3 chip breakers demolishes the concrete quicker and a tapered shoulder design minimises friction enabling the M2 drill bit to deliver faster drilling speed

DURABILITY: Rebar chamfers on the tip prevent side tip damage when hitting metal reinforcement and a thicker core body ensures higher power transfer, lower vibrations and less flute breakages

CHISELS

SDS-Plus extensions

Universal SDS-Plus extensions to extend the reach of SDS-Plus drill bits.
Tool free drill bit click & connect system.
Fits to all SDS-Plus rotary hammers and drill bits.
Optimal for drilling around obstructions such as previously installed pipes and for overhead drilling.
Allows deep hole drilling e.g. rebar applications without buying an expensive long drill bit.
Diameter of the quick lock mechanism: 21 mm.

DUST MANAGEMENT

Accurate concentricity and high dimensional accuracy drilled holes, according to PGM Conformity

Faster and more efficient drilling due to **99% dust removal**

Efficient drilling without dust for a safer and cleaner working environment

Active drill bit heads cooling for a longer life

SDS-Plus DUST-LOK dustless drill bits - 4 cut - Modular design

Efficient drilling without dust for a safer and cleaner work environment.

Captures 99% of drilled dust.

Active drill bit head cooling for a longer life.

4 cutter design prevents the drill bit from jamming in the rebar.

Accurate concentricity and high dimensional accuracy drilled holes, according to PGM.

Universal connector for all common vacuum cleaners with hose diameter 32 - 38 mm.

PCHDE - Universal chiselling dust extraction system

Universal dust extraction solution fitting to all brands of SDS-Max hammers.

Collects over 90% of chiselled dust.

Saves valuable post cleaning time.

Fits to Milwaukee® vacs with easy and secure click system.

Can only be used with DE type chisels listed below.

The following spare parts are avaiable for a quick turnaround: spring (4931328988), rubber rings (5 pc) (4931455278), main housing (4931449576) and front hose with plastic nose (4931455277)

DRILL TO THE MAX.

SDS-MAX MX4™ DRILL BITS

Milwaukee Tool leads the way in accessories development and technology for the professional job site. Our relentless pursuit of innovation has resulted in the Next Generation MX4™ SDS-MAX drill bits, our most powerful and durable drill bit for toughest tasks on the job site.

Driven and developed by countless hours on the jobsite, MILWAUKEE® has created MX4™ SDS-MAX as a drill bit designed to offer the fastest performance and longest lifespan when drilling in reinforced concrete. Featuring MILWAUKEE® exclusive Target Tip Technology, SDS-MAX is larger than the standard SDS-PLUS bits, providing improved accuracy and performance in rebar as well as other heavy-duty applications.

2x

LIFE IN REBAR*

* Vs previous generation

*Variable 4 flute design for diameters up to 16mm, all larger diameters have a variable 2 flute design.

Drill Connect

The innovative Drill Connect System is the ultimate solution for those requiring maximum versatility with large diameter drilling tools.

Versatile:

Drill Connect acts as a link between machine and drilling tools. On one side the system is totally compatible to all SDS-Max reception drilling tools such as drill bits, tunnel bits and core cutters. On the opposite side, between the rotary hammer and the Drill Connect attachment, one can fit the extension piece with the desired length.

Cost effective:

Professional users always require both long and short length drill bits and depending on the application sometimes even of the same diameter. But now, one can reduce the total number of drilling tools with the help of the Drill Connect System which makes it possible to interchange the drilling tools diameter and length in one simple step. Therefore users can reap the benefits of purchasing the cheaper short length drill bits and extending the length with the economical extensions plus the flexibility of Drill Connect reduces the overall quantity of drill bits one must carry in their toolbox.

100% Power:

The Drill Connect attachment provides a quick and safe connection between drilling tool and extension piece and therefore ensures that 100% of the power is completely transmitted to the drill bit tip.

Less weight:

The combination of short drilling tools and 18 mm diameter extensions reduces the overall weight by up to 15%.

- We recommend that Drill Connect be cleaned of concrete dust and lubricated with grease at regular intervals (Grease – Part-no. 4932352273).
- Drill Connect is only suitable for drilling tools in excess of 32 mm diameter and limited for use with rotary hammers up to 8 kg in weight.

Drill connect

Suitable for use with drilling tools with a Ø of 32 mm and above.
For use with rotary hammers up to 8 kg in weight.

SLEDGE™ CHISELS

3X
MORE LIFE
*VS STANDARD CHISELS

Our SLEDGE™ Chisels stay sharper for longer. Reinforced edges deliver maximum durability and reduced wear over the life of the chisel. We've engineered these chisels to maintain sharper edges for increased productivity with an optimized tip for fast removal of concrete, rust, cutting troughs, and asphalt.

No re-sharpening or re-hardening necessary for reduced downtime. High grade forged steel for maximum durability and longer life in concrete demolition over our standard scraping chisels. For use with SDS-Plus & Max rotary hammers.

2 CUTTER CARBIDE TIP

- Allows drilling into concrete, bricks, roof tiles, cinderblocks, thin metal, ceramic, tiles, wood, PVC, aluminium, drywall, mortar and plywood
- Very popular drill bits for plumbers because of the versatility

WHITE FLUTE

- To identify the drill bit easily in the users toolbox
- First to market with a white flute

HEX SHANK

- To use with an impact driver and all types of 3 jaw chucks tool like a (percussion) drill driver
- Ensures a safe grip also in standard 3 jaw chucks

MULTI MATERIAL DRILL BITS

Our Multi-Material Drill Bits are the most versatile bits, designed to tackle materials such as brick, block, concrete, steel, aluminium, ceramic tile, wood, PVC, and drywall. The aggressive multi-grind carbide tip delivers up to 10x longer life in stacked materials and up to 85% faster drilling speeds in metal. Equipped with a 1/4" hex shank, these general-purpose bits are compatible with impact drivers.

Multi material drill bits

Impact rated: Designed for use with impact drivers and all types of 3 jaw chuck tools like rotary drill/ drivers and percussion drills.

Hex shank up to 260mm total length, 3 flat shank on 400mm total length drill bits.

Tungsten carbide tipped (TCT) drill bits allow drilling into concrete, bricks, roof tiles, aerated concrete blocks, thin metal, aluminium, soft to medium hardness ceramic tiles, all wood types and PVC.

White flute to identify the drill bit easily in the users tool box.

DESIGNED FOR USE IN
PACKOUT™

Premium concrete drill bits - 3 flat shank

Tungsten carbide tipped (TCT) drill bits allow drilling into concrete, aerated concrete blocks, masonry, slate and granite.

From Ø 5 mm the hammer drill bits are supplied with a 3 flat shank to prevent the drill bit slipping in the chuck. Ø 3 & 4 mm the drill bits are supplied with a round shank.

Glass & tile bits

Suitable for drilling in non toughened glass, soft to medium hardness tiles and ceramics.

Sharpened carbide for faster drilling.

Reinforced carbide head for increased durability.

Red painted tip.

From Ø 5 mm the glass & tile drill bits are supplied with a multi-flat shank to prevent the drill bit slipping in the chuck.

Hammer drill bits - round shank

Diamond ground percussion carbide tip with two cutting edges.

For drilling in brick, soft ceramic tile, plaster and aerated concrete blocks.

From Ø13 mm the drill bits are supplied with a multi-flat shank to prevent the drill bits slipping in the chuck.

SHOCKWAVE IMPACT DUTY

Impact rated wood auger bits

Suitable for use with all types of corded / cordless drills including impact wrenches.
Drilling with an impact wrench enables drilling holes with less effort, one hand drilling, drilling up a ladder and above head height with less risk of injury from the tool clutching out.
Special zone hardening process ensures an extra hard shank, durable tip and perfectly flexible bit body.
New MILWAUKEE® Through-Center head geometry with the lead cutting edge lines up with the center of the feed screw - this ensures efficient chip removal and allows for continuous feeding.
20° rake angle of the lead cutting edge creates a path for easy chip ejection.
Polished and powder coated flute design produces a non-stick surface for increased chip ejection, reduced chip clogging and higher selffeeding capability.
Milling marks are removed in the finishing process, creating a smooth surface.
Lewis flute with large, wide throat design for rapid chip removal.
Sharp ground cutting lips for smooth clean holes.
Resharpenable cutting lips.
With 7/16" shank - to fit square drive 1/2" impact wrenches the adaptor 48660061 is required.
Suitable for hard & soft wood, wet & treated wood, plywood, chipboard, WPC (wood plastic composite), laminated beams and panels, exotic and hard woods e.g. bongossi, iroko, teak, beech, oak, etc.

Impact wood auger bits - short series

Special short design enables drilling in tight and normally non accessible places.

WOOD DRILLING SPEEDS

The following table give recommended drilling speeds for the most efficient cutting speed. The table should only be used as a guide and are dependant on the user and material being drilled.

SHOCKWAVE IMPACT DUTY

Forstner bits / Selffeed bits

Auger bits

Wood auger bits

For heavy duty, precision drilling in soft and hard wood, large section beams, joists, floor boarding, chipboard and plywood.
Lewis flute design for rapid chip removal.
With Hex shank for secure chuck grip.

Forstner bits

Centre point for precisely locating the bit. Peripheral cutters ensure splinter free drilling in all natural soft and hard woods.
Manufactured according to DIN 74836. Suitable for heavy-duty applications in all natural, soft and hard woods.

SWITCHBLADE™ selffeed bits

Speed: Aggressive feed screw design allows the bit to pull through the wood faster and without effort, resulting in faster drilling.

Replaceable SWITCHBLADE™: The SWITCHBLADE™ replaceable blade system ensures your blade is always razor sharp. It increases productivity by eliminating resharpening downtime and it increases the overall life of the bit.

Application: Suitable for all general contractors, electricians, plumbers and HVAC engineers who require to drill through holes in wood for all types of pipe, vents and wire trunking.

Each selffeed bit is supplied with 1x blade, 2x replaceable feed screws, 1x set screws and 1x allen key.

Selffeed bits

All sizes have removable and replaceable feed screws.

Two feed screws supplied with each bit.

Feed screw provides fast, effortless feeding even in gummy woods.

Internal cutting plane shaves hole radius for clean, smooth holes without pressure.

Each selffeed bit is supplied with 2 x feed screws, 1 x set screw and 1 x allen key.

Flat boring bits

Fast drilling of big diameters.
Suitable for drilling in natural hard and softwood and chipboard.
Ideal for door locks, morticing, electrical and plumbing work.
1/4" Hex shank reception (DIN E 6.3) for direct insertion into the power tool or for secure chuck grip.
Ground centre point for accurate positioning and sharp wings (not applicable to 6 & 8 mm) for improved cutting performance.

SPEED FEED™ wood drill bits

Step up from flat bit in quality and performance - faster drilling, higher lifetime and less jamming!
Dual cutting edges for fast and aggressive cut - up to 10 times faster drilling vs. flat boring bit.
Tapered design for reduced chip clogging, less friction and less jamming even in tough applications - results in less breakages.
Feed screw with coarse thread increases selffeeding in all types of wood - soft & hard, wet & treated.
Polished and powder coated flute design for increased chip ejection, reduced clogging and higher selffeeding capability.

HSS cable bits - DIN 7490

Manufactured from HSS steel for increased lifetime.
Suitable for drilling through holes in wood, plasterboard and metal channel.
Manufactured according to DIN 7490 and conforming to the German Employer's Liability Insurance Association in terms of safety requirements for the building trade.
The body of the drill bit is attached to the cylindrical shank by means of a thread, therefore eliminating the risk of breakage and guaranteeing

HSS Drill bit tip geometry

	Standard / Form	Application	Features
	Normal Standard Point	For standard drilling in ferrous/non ferrous metals and plastics	The wide cutting edge provides a drill bit that is robust and resistant to sideways pressure. Due to the wide cutting edge higher feed pressure is required. Can be easily resharpened.
	Chisel Edge Point DIN 1412 A	For drilling work in solid steel with large diameter drill bits.	Good and easy centering. Requires very low feed pressure – approx. 30% less than a normal point drill bit.
	Chisel Edge Point with corrected cutting edge DIN 1412 B	For drilling in high strength steel and high alloy steels. Also suitable for drilling thin sheet material.	Robust and resistant to sideways pressure.
	Split Point DIN 1412 C	For drilling in high strength steel and high alloy steels. Suitable for deep drilling bits.	Excellent chip removal makes this design ideal for deep drilling applications. Good centering. Low feed pressure required.
	Double Angle Point for Cast Iron DIN 1412 D	For drilling cast iron.	Extended major cutting edges reduce wear on the cutting corners for improved lifetime. Good heat conduction. Resistant to sideways pressure.
	Centre Point DIN 1412 E	For drilling thin sheet metal and soft materials.	Easy centering. Low feed pressure required. Does not snatch when drilling thin materials. Accurate and clean holes.
	U Point	For high performance drilling in high strength steels such as stainless and acid resistant steel.	Easy centering. Produces small metal chips ensuring low heat build up and quicker material resulting in faster drilling.
	Quad Edge Tip	For drilling in high strength steel and high alloy steel.	Easy centering and fast drilling start with 135° split point tip. Four cutting edges create smaller chips to prevent heat build up for longer life.

HSS Drill bit application guide

The following table gives recommended drilling speeds for the most efficient cutting speed.
The tables should only be used as a guide and are dependant on the user and material being drilled.
Coolants and lubricants will improve tool life by up to 5 times and workpiece finish.

					Hole diameter Ø mm – RPM					
Material class		Material type	Hardness/ Tensile Strength N/mm²	Rockwell	Ø 1–2	Ø 3–5	Ø 6–10	Ø 11–15	Ø 16–20	Cooling agent

	Feed	Feed (mm/rev)			0.05	0.10	0.16	0.21	0.23	

RPM: The number of revolutions that a spindle/a cutting tool completes in one minute.

Feed: This is the linear distance at which the cutter is advanced against the workpiece during one rotation of the cutting tool.
It is expressed in units of distance per revolution – millimetres per revolution.

RED HEX & RED COBALT SPECIFICATIONS

QUAD EDGE™ TIP

- Unique combination of 135° split point and four cutting edges.
- Allows for precise and fast drilling start without walking.
- Four cutting edges create smaller chips to prevent heat build up to ensure longer life.

VARIABLE FLUTE GEOMETRY

- Faster material ejection.
- Helps the bit run cooler and prevent it from burning out faster.

ENHANCED TAPERED WEB

- Wider core towards the shank of the drill bit.
- Strengthens the core to increase overall flute durability.

Quad Edge™ Tip on sizes > Ø 4.5 mm. 3-Flat on HSS-Co sizes > Ø 5 mm.

RED HEX - SHOCKWAVE™ HSS-TiN metal drill bits

Impact rated drill bit with 1/4" hex shank optimised for impact drivers.
Titanium Nitride coating dispenses heat and makes the drill bit suitable for use also in high speed.

PACKOUT™**

RED COBALT - HSS-Ground - DIN 338 Cobalt metal drill bits

Metal drill bits ground from solid, extremely heat resistant 5% cobalt-alloyed high speed steel produced according to DIN 338.

Suitable for drilling high alloy content steels and metals with tensile strengths over 1000 N/mm² like stainless steel.

QUAD EDGE™ Tip: unique combination of 135° split point and four cutting edges: 135° split point allows for precise & fast drilling start without walking. Four cutting edges create smaller chips to prevent heat build up for longer life.

Variable flute geometry: For faster material ejection. Helps the bit run cooler and prevent it from burning out faster.

Enhanced tapered web: Wider core towards the shank of the drill bit. Strengthens the core to increase overall flute durability.

3-flat shank from Ø 5 mm for better grip and prevents chuck slippage.

Colour: bronze.

RED
COBALT

Countersinks: HSS / HSS Cobalt

NEW

According to DIN 335C / 90° angle.

Cutting edges: 3

Deburring and countersinking in one go according to DIN74/75.

Cutting geometry optimised for easy centering, good chip removal and low vibrations.

Best lifetime is achieved when used with lubricant.

Suitable for steel < 900 N/mm², aluminium and plastics.

THUNDERWEB

Metal drill bits HSS Ground - DIN 338

Milwaukee **THUNDERWEB**

The **THUNDERWEB** design is characterised by a conical shaped web which gets thicker towards the back of the drill bit. The web is the internal core of the drill bit.

Parabolic web cross section

- Large web thickness. Strength built in.
- Accepts higher feed pressure and torque.
- Less breakages. Good for drilling deep holes and on curved surfaces.
- Long life.

Standard drill bit

The web on standard drill bits is a constant thickness throughout the length of the bit.

Conventional type web cross section

THUNDERWEB SPECIFICATION

FLUTE GEOMETRY

- **THUNDERWEB** flute form ejects hot chips rapidly. Dissepates heat better increasing lifetime.
- Open flute form reduces drill drawback when drilling deeper holes.
- Sharpened edges reduce binding for faster cleaner cuts.
- Flatter twist angle creates smaller chippings, ideal for drilling harder steels ie. stainless steel.

135° SPLIT POINT

- Precision starting, drill bit won't walk.
- Penetrates quickly.
- Good for drilling on curved surfaces.
- Requires less effort/feed pressure.
- Excellent for very hard materials.

THUNDERWEB - HSS-Ground metal drill bits - DIN338

DESIGNED FOR USE IN
PACKOUT™

HSS-G metal drill bits - long - DIN 340 - 5 and 10 pack

High quality high speed steel.
Split point DIN 1412 C.
Right hand cutting edge.
135° angle for improved centering.
Most suitable for drilling deep holes in channels or where there are hollow sections.
Suitable for drilling steel, cast iron, alloyed and non alloyed material up to 900 N/mm².
Also suitable for wood and plastics.

HSS-G metal drill bits - short - DIN 1897 - 5 and 10 pack

Drill bit quality: High quality high speed steel. Tip geometry: Split Point DIN 1412 C. Point angle: 135°. Tolerance: h8. Flute / Helix angle: Type N flute and normal 20 - 30° angle. Right hand cutting edge. Surface / Colour: Polished silver. Withstands high drill point pressure due to short overall length. Excellent concentricity. Polished type N flute with right hand cutting edge, eliminates binding for faster chip removal and faster cutting with less effort. Application: Most suited for drilling sheet and thin walled materials. Suitable for drilling in sheet steel, thin alloyed and non-alloyed material up to 900 N/mm². Also suitable for wood and plastics.

HSS-G metal drill bits - double ended - 10 pack

Drill bit quality: High quality high speed steel. Tip geometry: Split Point DIN 1412 C. Point angle: 135°. Tolerance: h8. Flute / Helix angle: Type N flute and normal 20 - 30° angle. Right hand cutting edge. Surface / Colour: Polished silver. Split point tip for good centering. Both ends can be used. Due to its short length it can be used with higher feed pressure without the risk of breakage. Excellent concentricity. Polished type N flute with right hand cutting edge, eliminates binding for faster chip removal and faster cutting with less effort. Application: Suitable drilling in steel, non-ferrous metals and plastic. Most suitable for thin sheet materials e.g. rivet holes.

Metal drill bits HSS Rollforged - DIN 338
with reduced shank

High speed steel rollforged metal drill bits produced according to DIN 338.

Oxide coating enables quick swarf removal.

Normal point shaped cutting tip with 118° angle.

Type N flute normal angle.

Suitable for drilling in steel, cast iron, alloyed and non-alloyed material up to 800 N/mm².

Colour: black.

Ø 13.5 mm - Ø 16 mm = 10 mm shank / Ø 16.5 mm - Ø 20 mm = 13 mm shank.

NEW
COBALT
STEP
DRILLS

New Aluminum Chromium Nitride (AlCrN) coating for 10x more life vs. MILWAUKEE® standard step drill. For steel and stainless steel.

MATERIALS:

STEEL	COPPER	BRASS	ALUMINIUM	STAINLESS STEEL	PLASTIC
-------	--------	-------	-----------	-----------------	---------

- 1 RAPID STRIKE TIP™: Accurate start without walking and fast drilling without the need to pre-drill the material.
- 2 Optimised 2 flute ground sharpened edge geometry for 2 x faster and smoother cutting.
- 3 Special tip and step geometry for jam-free performance - less risk of drill snagging when used with high speed cordless tools and also prevents deformation of the drilled material.
- 4 Produced from custom engineered steel with black oxide coating for 4 x longer life.
- 5 Laser engraved size markings for best long term visibility.
- 6 Each step is relief ground to drill and deburr automatically.
- 7 With 3 flat secure grip to prevent step drill from slipping in the chuck and ensure maximum transmission of torque.

TRADES:

Drilling of panels and cabinets for cable gland installation

Access holes for pipework and installation

Cobalt ALCrN step drills

NEW

New Aluminium Chromium Nitride (ALCrN) coating for 10x more life vs. MILWAUKEE® standard step drill.

For steel and stainless steel.

RAPID STRIKE TIP™: Accurate start without walking and fast drilling without the need to pre-drill the material.

Special tip and step geometry for jam-free performance - less risk of drill snagging when used with cordless tools and also prevents deformation of the drilled material.

Optimised 2 flute ground sharpened edge geometry for 2 x faster and smoother cutting.

With 3 flat secure grip to prevent step drill from slipping in the chuck and ensure maximum transmission of torque.

Laser engraved size markings for best long term visibility.

Includes 2 cobalt step drill bits: 4 - 20 mm, 6 - 35 mm										

SHOCKWAVE
IMPACT DUTY

SHOCKWAVE™ IMPACT DUTY step drills

SHOCKWAVE™ Impact Duty step drills are designed to deliver best-in-class performance in impact drivers and also the versatility to be used in drill drivers.

The 1/4" Hex shank with an optimised SHOCKZONE™ ensures maximum durability by preventing early shank breaks.

New Titanium Aluminium Nitride coating helps to reduce heat generation for 5x more life.

RAPID STRIKE TIP™: Accurate start without walking and fast drilling without the need to pre-drill the material.

Dual spiral flute design: Optimised for impact driver speed and for smooth, jam-free drilling.

Laser engraved markings: Do not wear away with time.

Magnetic Drilling

100% Faster

Speed and time savings are achieved due to the following factors. Firstly the annular cutter principle of only cutting material from the periphery of the hole as opposed to the twist drill which must cut the complete diameter of the hole. Secondly the benefit of two aggressive sharp angles per cutting edge help to achieve faster feed rates and lower cutting resistance.

30% More productivity

Because the annular cutter is only cutting material from the periphery of the hole. Less motor energy and driving power is required. The larger the drill diameter the greater the energy saving.

Longer lifetime

The annular cutters cutting edges do less work than the twist drill resulting in more holes between sharpening. Thick 6 mm body together with special tooth geometry ensures high stability and reduces to a minimum the risk of breakage due to overloading.

Speed chart

HSS annular cutters 30 mm

Thick walled HSS annular cutters for increased durability and life time.
With standard 19 mm Weldon reception.

MILWAUKEE®
HOLESAW
RANGE

If you're cutting or boring holes, look no further than our range of holesaws and the HOLEDZER™ product line.

HOLE DOZER™

The MILWAUKEE® HOLE DOZER™ is the jobsite workhorse that provides unstoppable durability through the most demanding applications.

Multiple leverage points to remove material out of the holesaw for faster plug removal.

- Deepest access for thick plugs
- Higher access for thin material
- Minimises downtime between cuts
- New coating allows less friction and increases drilling speed

A 3.5 teeth per inch tooth design with a positive 10° tooth angle provides the following benefits:

- Faster and more aggressive cut.
- Improved heat dispersion during cutting ensures that the teeth stay sharper for longer.
- Deeper curved gullets provide more efficient chip clearance preventing clogging and heat build up.
- Special shaped tooth angle has less tendency to snag on thinner materials.

This high quality holesaw range is the perfect solution for cutting all types of materials: - Steel up to 1000 N/mm² strength - Stainless steel and acid resistant steel - Non-ferrous metals - Cast iron - Aluminium - Wood - Medium density fibreboard (MDF) - Gypsum plasterboard - Sandwich materials - PVC.

HOLE DOZER™ bi-metal holesaws

HOLE DOZER™ bi-metal holesaws - sets

Description	Pack quantity	Min. order quantity	Article Number	EAN Code		
7 pc Hole Dozer™ Holesaw set						
① 5 x holesaws: Ø 19, 22, 25, 29, 32 mm. Arbor for Ø 14 - 30 mm holesaws. Spacer and adaptor. 1/8" allen key	7	1	49224083	045242310760	<price o="248517" ps="1" s="184" t="5"/>	<price o="248517" ps="1" s="184" t="6"/>
Hole Dozer™ holesaw set (10pc)						
② 6 x holesaws: Ø 25, 32, 40, 54, 68, 76 mm. Arbor for Ø 14 - 30 mm holesaws. Arbor for Ø 32 - 152 mm holesaws. 2 x pilot drill bits. 1/8" allen key	10	1	49224201	045242348091	<price o="248519" ps="1" s="184" t="5"/>	<price o="248519" ps="1" s="184" t="6"/>
Hole Dozer™ holesaw set (14pc)						
③ 10 x holesaws: Ø 19, 22, 25, 29, 32, 35, 38, 44, 51, 57 mm. Arbor for Ø 14 - 30 mm holesaws. Arbor for Ø 32 - 152 mm holesaws. 2 x pilot drill bits. 1/8" allen key	14	1	49224152	045242271047	<price o="26745" ps="1" s="184" t="5"/>	<price o="26745" ps="1" s="184" t="6"/>
Hole Dozer™ holesaw set (17pc)						
④ 13 x holesaws: Ø 20, 22, 25, 32, 40, 44, 51, 57, 64, 65, 67, 68, 76 mm. Arbor for Ø 14 - 30 mm holesaws. Arbor for Ø 32 - 152 mm holesaws. 2 x pilot drill bits. 1/8" allen key	17	1	49224102	045242271054	<price o="26837" ps="1" s="184" t="5"/>	<price o="26837" ps="1" s="184" t="6"/>
Kit box for holesaws						
⑤ Arbor with pilot drill bit (4932479465). Arbor with pilot drill bit (4932479467). 2 x Pilot drill bits. 1/8" allen key (49960060)	4	1	4932430327	4002395379880	<price o="221580" ps="1" s="184" t="5"/>	<price o="221580" ps="1" s="184" t="6"/>
Hole Dozer™ PACKOUT™ holesaw set (12pc)						
⑥ 10 x holesaws: Ø 20, 25, 32, 35, 40, 44, 51, 54, 68, 76 mm. Arbor for Ø 14 - 30 mm holesaws. Arbor for Ø 32 - 152 mm holesaws. 1/8" allen key	12	1	4932472248	4058546338947	<price o="497366" ps="1" s="184" t="5"/>	<price o="497366" ps="1" s="184" t="6"/>

HOLE DOZER™ carbide holesaws

Up to 10x more life, high heat and wear resistance compared to Bi-Metal holesaws.
3 Tpi aggressive tooth geometry with large gullets for improved material removal.
Offset teeth for less resistance.
PLUG JACK™ slot geometry provides deep access to remove thick plugs and high leverage for thin materials.
Application areas: metalworking (stainless steel, high alloy steels, aluminium) and composites (plastics, sandwich material, computer flooring, fibreglass, plastic coated wood boards, nail embedded wood).

Adjustable hole cutter

For cutting large diameter holes for air conditioning pipes, fans, downlights and ceiling speakers.
Dust collection shroud for 100% dust free work when overhead drilling.
Diameter is adjustable from 51 mm to 178 mm in 6.4 mm steps.
Laser marked preset diameters at 51 - 178 mm.
Suitable for use on drywall (max. 25 mm) and ceiling tile. Not suitable for OSB wood boards.

		Cutting oil	Dry	Cutting oil	Cutting oil	Turpentine	Dry	Dry

Speed kills!

Operating at higher speeds than those recommended will shorten the life of the holesaw and produce very inefficient cutting.

Feed Pressure:

Variables in material, work configuration should be considered. Apply sufficient feed pressure to aid good chip re-moval. Reduce the pressure when the holesaw becomes hot or if the teeth start to clog with material. Insufficient feed pressure will dull tooth points prematurely but too much pressure can totally destroy teeth.

Cooling Lubricant:

Cutting oil serves two purposes when sawing in metals. It cools the saw and the work piece. It reduces heat and abrasion which can shorten cutting life. It also aids re-moving swarf from the cutting surface. Using a cooling lubricant will extend the life of your holesaw by 500%.

T.C.T. Stainless steel holesaws

Carbide tooth technology provides for best performance, speed and 10x more lifetime than standard bi-metal holesaws. Teeth can also be resharpened.

Extra deep 25 mm cutting depth for drilling in sheet material and pipes.

One solid piece holesaw design reduces wobble and vibration for accurate drilling.

Safety stop collar prevents over drilling for best safety.

Ejector spring helps eject the slug, prevents jamming and saves time.

With 3-flat secure grip shank reception to prevent the holesaw slipping in the chuck and to ensure maximum torque transmission. Diameters 16-76 mm with 10 mm and >80 mm with 13 mm 3-flat shank reception.

Replaceable pilot drill and spring.

Use a cooling lubricant to extend the life of the holesaw. For metals use cutting oil, aluminium turpentine, plastics water and for cast iron drill dry.

Suitable for drilling steel (<1200 N/mm²) up to 4 mm, stainless steel up to 2 mm, aluminium, zink, cast iron, copper, fibreglass and PVC.

BIG HAWG™ multi material holesaws

BIG HAWG™ multi material holesaws are ideal for electricians, carpenters, kitchen fitters & all related heating, ventilation and plumbing trades.

Designed for use in a wide variety of materials:

Bricks* - suitable for both solid bricks and bricks with cavities.

Aerated concrete blocks*, lightweight aggregate blocks and breeze blocks.

Soft density lime-sandstone building blocks up to hardness of 30 N/mm².

Softwoods, chipboard, plywood, medium density fibreboard (MDF).

Plastics and plastic coated board (Contiboard).

* Not suitable for use in hard materials such as concrete, granite, medium to hard density lime-sandstone block, natural stone and hard brick over 30 N/mm² hardness.

SHOCKWAVE
IMPACT DUTY

APPLICATION AREAS

CERAMIC TILES

- All types hard and soft:
Porcelain / Gres / Granite / Quarry /
Terrazzo / Artificial stone / Terracota /
Agglomerate / Glazed

CAST IRON

FIBREGLASS / GRP

- (Glass reinforced plastic) / Perspex

HOW TO USE:

- Screw the grinder adaptor M14 to the holesaw and tighten firmly with a spanner. Then apply the spindle lock on the angle grinder and fit the adaptor directly onto the spindle; tighten firmly with a spanner.
- If the tile is not fitted to a wall or floor ensure it is secured firmly with a clamp.
- Switch on the tool to full speed. Slowly approach the tile with the drill bit at a 20-30° angle with light pressure to avoid skating on the tile. Once the drill bit starts to cut into the tile and forms a groove, gradually raise the drill so that it is horizontal (90°) with the tile.
- Apply light pressure and an oscillating circular motion during cutting to maximise tool life.
- When cutting material thicker than 10 mm, to optimise life and speed of cut, lift the drill/hole saw out of the hole every 5 seconds and allow it to rotate in the air to cool before continuing with the cut.

M14 DIAMOND TILE DRILLBITS

**DIAMOND
MAX**
TM

Diamond grit drills and holesaws are designed for cutting holes in extremely hard materials such as porcelain/gres/quarry tiles, cast iron or fibreglass. These bits & holesaws guarantee superior life and fast cutting even in the hardest of materials. Can be used either on angle grinders with relevant adaptor or with a drill driver.

Minimal water cooling: A continuous flow of water is not required to cool the bits & holesaw during cutting. Simply dip them in water before starting the cut and every 5 seconds during cutting for optimal performance.

Clean holes: Drills clean, precise holes without any perimeter scratches.

Superior lifetime and durability due to the high grade diamond bond and the tough alloy body which resists bending under stress.

Easy slug removal due to the multiple access slots.

M14 diamond router bit

For milling and modelling applications in different materials e.g. porcelain tiles, granite, natural stone, marble, engineering bricks, roof tiles and concrete.
For chamfering all the mentioned materials.
For expanding existing holes.
M14 thread: To fit directly onto an angle grinder.

Wet Diamond Drilling Cores

- ① Standard 1/4" UNC reception
- ② Stamping of diameter and type on the core reception for longterm visibility
- ③ Laser welded segments guarantee against break off
- ③ 10 mm segment height for superior lifetime

WCHP

WCHP-TK

THIN KERF Wet diamond drilling cores

Cordless optimised diamond segments designed especially for MXFuel tool.

Optimised for corded diamond drills up to 2200 Watt.

10 mm laser welded segments for superior lifetime.

Standard 1/2" G reception on smaller diameters & standard 1 1/4" UNC reception on bigger diameters.

Dry diamond cores with dust extraction
- DCHXL

10 mm high, laser welded segments for longer life.
Use with the machine set to rotary only, not suitable for hammer action.

Material	DCHXL	Material	DCHXL
Aerated/breeze concrete blocks	✦	Granite	✗
Artificial stone – hard	✗	Lime/sandstone – hard	✓
Brick – very hard, engineering brick	✓	Lime/sandstone – soft/abrasive	✦
Brick – medium	✓	Marble	✗
Brick – soft	✦	Tiles	✗
Concrete	✗		

✓ Most suitable. Recommended for these materials.
✗ Not suitable. Not recommended for these materials.
✦ Limited suitability – recommended for intermittent use.
Very good in drilling characteristics, but reduced lifetime.

SHOCKWAVE
IMPACT DUTY

DRIVING
PERFORMANCE FORWARD

SHOCKWAVE™ IMPACT DRIVER BITS

MILWAUKEE® SHOCKWAVE™ IMPACT DUTY driver bits are engineered to be the most durable, best fitting driver bits on the market. The WEAR GUARD TIP™ is laser hardened to create an outer shield that protects the fit over the life of the bit. The SHOCK ZONE™ is optimized for each tip type and length of driver bit, absorbing peak torque and preventing breaking. The customized CUSTOM ALLOY 76™ steel and heat treatment for each tip type is engineered to ensure best performance across tip types and extended life vs. standard bits. The SHOCKWAVE™ impact driver bits provide extreme durability for the most demanding job site applications.

SHOCKWAVE

IMPACT DUTY

IMPACT

SHOCKWAVE™ IMPACT DUTY screwdriving bits

Designed for use with impact drivers the SHOCKWAVE™ IMPACT DUTY accessory line is not only ideal for heavy duty impact applications, but also delivers a full system solution for all the user's drilling and fastening needs.

Laser hardened WEAR GUARD TIP™ for improved wear resistance and protection of the fit over the life of the bit.

SHOCK ZONE™ Geometry - designed to flex:

SHOCK ZONE™ reduces stress at the tip resulting in less tip breakages. The combination of the SHOCK ZONE™ design and special heat treatment absorbs impacts and allows the bit to flex with spring like action.

Custom engineered steel - Milwaukee® custom metal formula makes the SHOCKWAVE™ bits more resistant to shock from impacting.

SHOCKWAVE™ right angle attachment

The right angle attachment is a useful device for screwdriving or drilling applications in restricted, difficult to reach areas.
Impact rated: suitable to use with latest 18V impact drivers as well as cordless drill drivers.
Internal SHOCK ZONE™ and advanced gear design for excellent power transmission and impact durability.
For all 1/4" Hex driving and drilling accessories.
Very compact design: only 36 mm in height and a true 90° angle to allow access into confined spaces.
Ergonomic rubber overmold for secure and comfortable handling.
Pack contains 1 x right angle attachment and 10 x 25 mm screwdriving bits.

OSD2 - Offset screwdriver/ drill angle attachment

The OSD 2 screwdriver / drill angle attachment is the ideal solution for all screwdriving and drilling applications in restricted areas. 1/4" magnetic Hex bit reception accepts both standard 25 mm (C 6.3) and ball end reception (E 6.3), with bit locking mechanism. Metal gears and housing for smooth and precise running and excellent power transmission. 360° rotatable softgrip side handel for left and right hand use with 4 lock positions. Two step Hex shaft to fit either 1/4" (6 mm) Hex shaft or 10 mm Hex shaft. Industrial quality designed for use with all cordless tools in applications up to 40 Nm torque and a maximum of 1750 rpm. The OSD2 is capable of both drilling and screwdriving applications, offering maximum versatility. Only 51 mm in height for use in confined spaces.

Screwdriving bits

The ribs are cold formed to exact specification ensuring reduced wear from slippage. The tip is subjected to a special hardening process with temperatures up to 870°C.

The outcome is a bit with a hardness of 60 HRC. This extra hard tip ensures extra long life under constant use.

The body is manufactured from the highest quality S2 european steel.

The sign of quality: All bits are laser marked with the MILWAUKEE® logo and tip reception for easy identification.

Staples - fencing

NEW

Fencing staples for the Milwaukee M18 FFUS.
For all types of wire fencing attached to wood ie. livestock fencing, square/chain/barbed wire and high tensile wire.
Hot dipped galvanised coating for superior long term corrosion resistance.
4mm thick steel wire for best lifetime in outdoor applications.
Sharp divergent point tips – the staple point tip twists as it is driven into the wood giving better holding power.
Red adhesive coating for increased drivability while maximizing holding power.
Paper tape collation for speed and convenience.

Staples - electrical cable

NEW

Cable staples for the Milwaukee M12 BCST
19mm wide 25mm longstaples for fixing all types of electrical/ data cable to wooden joists / structures. Not suitable for fixing to concrete.
Flat top staple with a plastic bridge on the inside. The plastic bridge ensures cables will not be damaged or cut when fixed.
Suitable only for internal use.

INTRODUCING

NITRUS CARBIDE™

TORCH™ NITRUS CARBIDE

CUT TOUGHER

Our SAWZALL™ The TORCH™ with NITRUS CARBIDE™ for CAST IRON and other thick metals is the next generation of carbide teeth technology. The blade delivers 3X the life of existing carbide teeth reciprocating saw blades to continuously make the toughest cast iron removals on the job.

*vs standard Carbide blades

3x LONGER LIFE*

CARBIDE TEETH CUT LONGER. CUT MORE. CUT FASTER.

x50 LONGER LIFE

This blade delivers up to 50X life over bi-metal standard blades

1000 MORE CUTS

The Ax with Carbide Teeth is optimized for Cordless Recip Saws delivering over 25% more cuts per charge

x2 FASTER CUTS

This blade delivers up to 2X faster cuts than bi-metal standard blades

Metal: Heavy duty TORCH™ with NITRUS CARBIDE™

The TORCH™ blades with NITRUS CARBIDE™ teeth is the next generation of carbide technology. This special carbide NITRUS blend is designed to cut 3x longer than existing standard carbide teeth blades. Constructed with a 8 Tpi design for fast starts and smooth cuts, large gullets for easy chip ejection, and a unique carbide blend, the TORCH™ Blades with NITRUS CARBIDE™ are designed to last the longest and cut the fastest in cast iron/ SML pipe and other thick metals. Thick 1.27 mm robust blade body for precise straight cuts. 25 mm blade height for improved stability and minimum vibration. Best performance in all thick metals and especially cast iron soil, waste and drainage pipes.

Metal: Heavy duty **TORCH™** demolition blades

**DOUBLE
DUTY
UPGRADE™**

**2X
LIFE™**

Improved tooth geometry for best speed and double the lifetime.
Thick 1.06 mm robust blade body for precise cuts.
25 mm blade height for improved stability and minimum vibration.
Bi-Metal quality cutting teeth with 8 % cobalt the ultimate in performance and lifetime.

**TOUGH
NECK**

Stamped indentations around the reception strengthens the blade at its weakest point.

**GRID
IRON™**

A grid iron pattern is built into the blade to make it more rigid with less tendency to bend or buckle for best durability and straight cuts.

Metal: Heavy duty **TORCH™** demolition blades

*vs. standard Bi Metal blades

Wood with nails: Heavy duty AX™ carbide teeth demolition blades

Up to 50x longer life than standard Bi-Metal blades. Carbide teeth deliver long life and extreme durability in the toughest applications. Cuts through hardened screws and fasteners.

Up to 2x faster than standard Bi-Metal blades. A fast and aggressive 5 Tpi tooth pattern allows for the fastest cutting in nail embedded wood and a wide range of construction materials (wood/nails/bolts/screws/cast iron/asphalt roofing felt shingles).

Up to 25% more cuts per charge vs. standard Bi-Metal blades. Optimised for use with cordless reciprocating saws.

FANG TIP™: For faster plunge cutting and reaching into restricted areas.

NAIL GUARD™: Protects the tooth during nail impacts for increased durability and lifetime.

Sloped shape: Excellent for plunge cutting and reaching into restricted areas.

Thick 1.27 mm robust blade body for precise straight cuts.

25 mm blade height for improved stability and minimum vibration.

Best for wood / nails / hardened fastners demolition

Multi material : Heavy duty WRECKER™ carbide teeth demolition blades

The multi material WRECKER™ with carbide teeth cuts all from thick metal, cast iron, nail embedded wood, hardened screws and fasteners.
Up to 50x longer life than standard Bi-metal blades. Carbide teeth deliver long life and extreme durability in the toughest applications.
Up to 25% more cuts per charge vs. standard Bi-Metal blades. Optimised for use with cordless tools.
FANG TIP™: For faster plunge cutting and reaching into restricted areas.
Thick 1.27mm robust blade body for precise straight cuts.
25 mm blade height for improved stability and minimum vibration.
Best for multi material demolition (wood with nails or hardened fasteners, cast iron and thick metal)

Multi material: Heavy duty WRECKER™ blades

Strong and precise: Thick 1.27 mm blade body.
Bi-Metal construction: Excellent blade life and performance.
Tooth geometry: Aggressive strengthened tooth tip design and uniform gullet depth allows for more material to be removed per stroke for faster cutting.
Blade shape: Sloped - The sloped shape makes this blade ideal for plunge cutting. Most suited for cutting metal and for demolition applications (wood with nails).

SAWZALL™ blades for special materials

Special application: Ductwork blade

Plunge tip - fast plunging in materials < 0.6 mm. No need for extra tools.

Versatility - tapered blade body profile allows for tight radius cutting and square cuts.

Longlife - optimized tooth geometry 30 tpi for cutting thin material 0.6 - 1.5 mm. Most common spiral duct is 0.8 mm thick.

Blade length (mm)	Tooth pitch (mm)	Teeth per inch	Pack quantity	Min. order quantity	Article Number	EAN Code			
85	0.8	30	5	1	48001630	045242300174	<price	<price	<price

Special application: Drywall / plasterboard blade

Precise depth of cut - only 63 mm long, protects from unintentional cuts in pipes or wiring.

Double sided teeth - cuts in ALL directions - produces less dust than jobsaw handtool - cuts clean without ripping the drywall.

Plunge tip - fast and effortless plunging.

HACKZALL™ blades

Especially engineered blades for exclusive use on 12 V HACKZALL™.
Bi-Metal construction for increased tooth durability.
Optimised tooth form for aggressive and faster cutting.
Thinner blade body for better speed of cut and up to 35% more cuts per charge vs. standard Bi Metal blades.

JIGSAW BLADES

Flexible and shatter resistant
steel back for the most
demanding of applications

Bi-Metal

High speed steel teeth with extra
hard cutting edge

MATERIAL QUALITIES

HCS

- High Carbon Steel jigsaw blades are used for cutting all types of wood and plastics.

HSS

- High Speed Steel blades are suited to cutting metal, non ferrous metal and aluminium.

CARBIDE GRIT

- These blades have a tungsten carbide grit edge making them suitable for abrasive materials.

TC

- Blades with tungsten carbide tipped teeth are ideally suited to glassfibre reinforced products. Those blades with a continuous tungsten carbide tooth strip cutting edge are suitable for extremely hard materials such as stainless steel.

BI-METAL

- Bi-Metal blades consist of high speed steel teeth electron beam welded onto a flexible alloy steel back. These blades offer maximum performance in the most demanding applications in both wood and metal.

BI-METAL BLADES OFFER THE FOLLOWING BENEFITS:

- Flexible and shatter resistant
- Longer lifetime. Metal cutting blades offer double the lifetime and wood cutting blades more than 5 times the lifetime over conventional HCS and HSS blades.
- High wear rate and heat resistance ensure the teeth stay sharp longer.
- Faster cutting performance.

Blade colour code

Shank colour means application

2743 51

= For all types of wood, laminated chipboard, chipboard, plywood, blockboard and plastics. Silver colour blade body.

2540 63

= For all types of ferrous and non-ferrous metals, steel, aluminium, brass, copper, stainless steel, lead, tin and sandwich materials. Silver colour blade body.

3733 87

= For cutting a range of products, carton, rubber, fibreglass, foam and abrasive materials. Black colour blade body.

3733 90

= Bi-Metal blades come with a white body and then the corresponding colour shank; yellow for wood and blue for metal.

2540 63

Jigsaw blades for wood and plastic

Traditional blades

Traditional blades that deliver good and solid performance.

Curve cutting blades

All of our curve cutting blades are characterised by a narrow blade body for improved manoeuvrability.

Jigsaw blade 4932265312 and 4932430143 has cutting teeth on both sides.

The teeth on the back of the blade allows one to cut tight and acute curves with simplicity.

For best results work without pendulum action when cutting tight curves.

Jigsaw blades for metal

Traditional blades

Blade reference 4939274652 is especially suited to cutting very thin sheet material because of its low 0.7 mm tooth pitch. For those professionals desiring extra lifetime and durability we recommend the use of Bi-Metal blades in conjunction with a suitable cooling lubricant, the blades lifetime is double that of non Bi-Metal blades.

Curve cutting blades

Especially narrower saw blade body allows one to cut tight curves in a range of metallic materials.

Special application: Aluminium

Most traditional blades are also capable of cutting aluminium, however these two blades benefit from a larger tooth pitch and wider gullets offering better material removal which is an advantage when cutting aluminium.
When cutting curves or irregular shapes in aluminium we recommend the use of blade 4932346081.

Special application: Stainless steel

This blades teeth consist of a carbide tipped strip making it the most suitable and durable blade for steels with a high alloy content such as stainless steel.
For best results work without pendulum action and use cutting oil as a lubricant.

CIRCULAR SAW BLADES

CUTS COOLER. INCREASED ACCURACY. LONGER LIFE.

CUTS COOLER
ANTI-FRICTION COATING

INCREASED ACCURACY
LASER CUT TECHNOLOGY

COBALT INFUSED TUNGSTEN CARBIDE TEETH
PRODUCE SHARP AND CLEAN CUTS

ALTERNATE TOOTH BEVEL

TRIPLE TOOTH CHIP AND FLAT FORM

DIAMOND FLAT TOOTH

Circular saw blades for hand held circular saws

PTFE coating: Cuts cooler, non stick for quicker cuts. Protects against corrosion and accumulation of resin.

Laser cut vibration slots: Low vibration and increased accuracy. Slots are filled with polyurethane and act as shock absorbers by isolating the teeth from vibration.

High grade laser cut steel: Guaranteed accuracy.

Premium cobalt infused tungsten carbide: Sharp and clean cuts.

*Thin Kerf: Cordless optimised, extra thin cutting width for maximum runtime

*All wood types: Soft/ hardwood, plywood, laminated chipboard, melamine, MDF

Circular saw blades for metal

1. Engineered tooth geometry for optimum performance.
2. Top grade carbide and cermet tooth tips for superior lifetime.
3. Fully hardened and tensioned blade body for accurate cuts.
4. Deep gullets provide rapid and efficient chip removal.
5. Laser cut resin filled expansion slots for noise and vibration dampening.

- Cuts clean. Burr free edges reduce extra finishing processes.
- Cuts cool. The cut material can be handled immediately after cutting.
- Cuts fast. Quicker than all other conventional cutting methods.
- Cost cutter. Less expensive per cut than abrasive discs.
- Reduced noise.
- Reduced vibration.
- Total safety: no sparks, no coolants, cool to touch.

- ✓ Most suitable. Recommended for these materials.
 - ◆ Suitable. Recommended for intermittent use in these materials.
- Very good cutting characteristics, but greatly reduced lifetime of the blade.

Optimising Blade Life

1. Clamp the workpiece securely to avoid vibration.
2. Do NOT stack or bundle cutting material. The gaps between layers allow for more opportunities to chip the teeth.
The life of the blade is severely affected by this type of cutting.
3. Lower the blade to its maximum cutting capacity and allow the tool to come to full speed before applying the blade to the material.
4. Do NOT force the saw blade into the material. Start gently, then gradually apply enough pressure to avoid sparks.
5. Optimal cutting speed and pressure will produce little or no sparks. Sparking creates heat build up which shortens saw blade life.
6. Keep the cut straight. If following a cut line and you wander off the line, getting back on line may cause side loading of the blade and break teeth. Use a edge guide whenever possible.
7. Do NOT apply side pressure on the blade as this will cause chipping of the teeth.
8. Periodically allow the tool to run free of the cutting material to cool the blade and tool especially when making long cuts or cuts in thick material.

Premium Bi-Metal bandsaw blades

Multi pitch Bi-Metal blades with matrix II high speed steel teeth with 8% cobalt outlast conventional blades up to 3 times, requiring fewer blade changes.

Precision formed teeth create fast, clean cuts.

Optimised for cordless bandsaws: More cuts per charge.

Suitable for cutting: Angle iron, galvanised pipe and even tougher steels such as cast iron and stainless steel.

SPEEDCROSS

MILWAUKEE® SPEEDCROSS DIAMOND BLADES ARE ENGINEERED FOR ALL CONSTRUCTION SITE PROFESSIONALS WHO DEMAND ONLY THE BEST IN PERFORMANCE WHEN WORKING IN THE TOUGHEST ENVIRONMENTS.

Ø 350 x 25,4 mm
max. 5.400 rpm
max. 100 m/s
EN 13236
4932 4719 87

4 002396 298869

AUDD 350

Segments
High diamond concentration with special aggressive geometry gives a high cutting performance. Laser welded segments for 100% user safety.

Precision engineered blade body
Pre-tensioned and hardened blade body for perfect concentration and maximum resistance to heat build up.

Cool cutting slots
The slots and holes improve the airflow keeping the cutting temperature of the segments to a minimum. This safeguards the segments from heat damage and allows the user to cut more and quicker.

Noise reduction qualities
Perfect balance and concentration suppress cutting noise.

Low vibration
The tensioned blade body eliminates wobble and minimises vibration.

**DIAMOND PREMIUM BLADES
MAXIMUM SPEED AND LIFETIME!**

Speedcross Blades

SPEEDCROSS

**MAXIMUM SPEED,
LONG LIFE,
LOW VIBRATION!**

- Universal blades for a variety of materials
- Classed into two categories for maximum lifetime
- Laser welded segments for best performance
- Low vibration

Speedcross SUDD

NEW

Silent technology to reduce the noise level whilst cutting.

U-grooved segments for best dust removal and faster cutting.

Precise positioned and arranged diamonds for best cutting performance.

Laser welded segments with distinct stamped pattern to reduce heat build up.

Speedcross STEELHEAD™

STEELHEAD™ is most suitable for steel and stainless steel. Also suitable for heavily reinforced concrete

High density of special brazed diamonds ensure a very aggressive cutting progress

Due to the versatility and the outstanding performance the diamond disc is also perfect for fire brigades and for rescue operations

✓ Most suitable. Recommended for these materials. Very long service life and very good cutting characteristics.

◆ Suitable. Recommended for intermittent use in these materials. Good service life and cutting characteristics.

Combi-segment diamond cup wheels

For quick grinding down of thick concrete layers, abrasive materials or special substances.

For levelling of concrete, granite and natural stone surfaces.

For edge grinding applications e.g. grinding off high edges of concrete, granite, natural stone tiles.

For roughening prior to covering with a new layer of coating.

High quality diamonds and special soft bonding for low wear, especially in hard materials.

Cutting and grinding discs

MILWAUKEE® Type - how to find the right disc

S C 41 / 115			
Material	Application	Design	Diameter
S = Steel C = Stone	C = Cutting G = Grinding CS = Cutting Slim L = Flap LC = Flap Ceramic CT = Cutting Thin	flat 41 depressed 42 depressed 27 flap 50	mm inches 100 4 115 4½ 125 5 150 6 180 7 230 9 350 14

Extended life and moisture protection with PRO+**

■ Special mixture delivers:

Up to 20% longer lifetime vs. MILWAUKEE® contractor series.

Up to 20% less dust development vs. MILWAUKEE® contractor series.

The new formula HydroProtect prevents the age-related loss of performance and still provides almost the entire performance after months of storage.

■ Benefits:

Reduced costs per cut and shorter set up times.

Reduction of wheel deterioration during the storage interval.

Longer lasting high-performance.

**available on cutting and grinding discs with thickness 1, 1.5, 1.9 and 6 mm.

Thin metal cutting discs PRO+

Applications: Iron and sulphur free top line thin cut-off wheels for all steels. Best suitable for stainless (except the 350 x 4 mm) and acid-resistant steel, hardox, heat-resistant cast steel, spring steel, mild and tool steel.

Characteristics: 50% less cutting time and 50% less dust than standard 3 mm thick discs. Lower material loss.

Metal cutting discs PRO+

Applications: Great performance in cutting mild steel with medium strength, plain alloy tool steel, concrete reinforcing iron and steel rebar.

Characteristics: Efficient cutting properties in combination with high performance.

Flap discs CERA TURBO™

Maximum productivity with CERA TURBO™, 50% faster material removal and 2x longer lifetime vs. bonded disc.

Ceramic hybrid disc: grinds steel, stainless steel.

Plastic backing pad.

Highly flexible: perfectly adjusts to working piece.

Low heat development: no metal discolouration, especially on stainless steel.

Made in Germany.

Best for ferrous metals, stainless steel V2A (1.4301) / V4A (1.4401) and non-ferrous metals (aluminium, titan, etc.),

Orders must be in multiples of 10 pcs.

	Type	Disc diameter (mm)	Grit	Bore size (mm)	Backing pad material	Pack quantity	Min. order quantity	Article Number	EAN Code

Carbide Burrs

According to DIN 8033.
Double cut toothing geometry ensures excellent material removal, low vibrations for easier handling and smaller swarfs.
Suitable for unhardened and hardened steel, cast iron and non ferrous metals (aluminium, brass, copper).
Includes: Types B ,C ,D, H, M.
Type B: End cut cylinder for top and side cutting.
Type C: Cylindrical ball nose for top and side cutting.
Type D: Ball for milling holes and creating concave cuts.
Type H: Flame for contouring.
Type M: Cone for angled edges and narrow contours.

FIXTEC Nut

FIXTEC: Disc changing in seconds, no extra tools required.
Not suitable for use on angle grinders with a break or quick stop system.
Only 8 mm thick, enabling more surface of disc on the material.
Compatible to all manufacturers angle grinders up to Ø 150 mm with standard M14 spindle thread.
12 seconds from removing the worn disc to fixing a new disc.
With integrated keyholes, for removal of the nut with a standard pin spanner (Article number: 4932367712) in the event of the nut becoming too tight.

Description	Pack quantity	Min. order quantity	Article Number	EAN Code

MESH BACKING

WHY USE A PAD SAVER WITH POWERGRID MESH?

PowerGrid Mesh is very aggressive, dust could wear and damage the Velcro on the backing pad.

Pad savers are the solution to extend life of the machines backing pad.

APPLICATIONS

STANDARD

Mesh sanding sheets for M12 FDSS 67 x 92 mm

NEW

12 x longer life compared to standard sandpaper.

Open mesh structure for almost dust-free sanding and longest life. The mesh structure increases performance and reduces clogging.

Mesh sheet 67 x 92 mm is suitable for Mesh Sheets for M12 FDSS.

Can be cleaned with compressed air, vacuumed or rinsed out with water.

Application: wood, painted wood, plastic, filler, drywall, metal, plaster, lacquer.

Each pack includes 1 pad saver. Always use a pad saver when using mesh type abrasives, this protects the tool backing pad from damage.

Abrasive Belts for Band File

NEW

Ceramic grain quality: Extremely high removal rate with best lifetime.
For grinding metal weld seams, contours, edges and profiles.
Suitable for all metals (steel, non ferrous metals, aluminium, titanium and stainless steel).
Ceramic grain produces low heat, preventing metal discolouration on stainless steel.
Abrasive Belts are suitable for M12 FBFL10 and M12 FBFL13.

Polishers - System attachments

Red sponge: Polishing sponge hard. Hard sponge with coarse foam structure. For maximum removal of the reconditioning lacquer, removing deep scratches and polishing weather beaten lacquer.

Yellow sponge: Polishing sponge soft / fine. Soft sponge with fine foam structure. For fine polishing with polishing creams / wax compounds to remove fine scratches and holograms (swirls).

Blue sponge: Polishing sponge extremely soft / fine. Extremely soft sponge with fine foam structure. For fine polishing with polishing creams / wax compounds to remove very fine scratches and holograms (swirls).

Cloths: Microfibre polishing cloths. Super-soft premium microfibre polishing cloth for finishing gloss polishing. With good absorption properties perfectly suited for final finishing and removing water spots from sensitive surfaces. Colour coded for use with respective sponges and compunds to avoid contamination.

Machine-washable with 30° without softener.

System attachments - Wet diamond drilling

Description	Fits DD3-152	Fits DCM2-250C & DCM2-350C	Fits MXF DCD150	Pack quantity	Min. order quantity	Article Number	EAN Code
Fixing kit							
① Stud bolt, setting tool, wing nut, washer and 5 pcs M12 drop anchor	✓	✓	✓	9	1	4932399731	4002395363827
1 3/8" open ended spanner. For holding the motor output spindle while removing a core bit		✓		1	1	49964705	04524222766
② 32 mm ended spanner. For holding the motor output spindle while removing a core bit.	✓			1	1	4931428009	4002395844791
41 mm open ended spanner. For removing the core bit from the motor spindle.	✓	✓		1	1	4931428010	4002395844807
Fixtec release. Suitable for all diamond motors with 1 1/4" spindle reception. Prevents the core bit from locking itself too tight onto the machine spindle. The core bits can then be released and removed with minimum effort	✓	✓		1	1	4932352053	4002395367108
④ 1 1/4" female to 1/2" female adaptor. To enable the connection of <50 mm diamond core bits on a 1 1/4" machine spindle thread	✓	✓		1	1	4932352627	4002395372850
1 1/4" female / male extention rod, length 300 mm	✓	✓	✓	1	1	4932399724	4002395363759
⑤ 1 1/4" female / male extention rod, length 500 mm	✓	✓	✓	1	1	4932399725	4002395363766
⑥ Telescopic extention. Extension pole used to fix drill rig to the ground instead of anchor bolts. Maximum load of 500 kg and adjustable extension height from 1.8-2.9 m	✓	✓	✓	1	1	4932399732	4002395363834
⑦ Vacuum pump VP6	✓	✓	✓	1	1	4932352094	4002395367474
⑧ Vacuum plate. Replacement rubber seal 4931428665	✓			1	1	4932352676	4002395373345
⑨ WT 10 watertank	✓	✓	✓	1	1	4932399726	4002395363773
⑩ Water collection ring: For use with drill rig DR 152 T. For use with max. Ø 152 mm core bits				1	1	4932352677	4002395373352
Replacement rubber ring for DR 152 T				1	1	4932352678	4002395373369
⑪ Water collection ring: max. Ø 180 mm			✓	1	1	4932399727	4002395363780
Replacement rubber ring for DR 250 TV			✓	1	1	4932399729	4002395363803
Water collection ring: For use with drill rig DR 350 T. For use with max. Ø 300 mm core bits				1	1	4932399728	4002395363797
⑫ Replacement rubber ring for DR 350 T				1	1	4932399730	4002395363810
⑬ Spacer block T = 50 mm. Needs to be mouted between drill rig and motor cores > 250 mm and max. 350 mm. Included in drill rig DR 350 T	✓			1	1	4932399736	4002395363872
⑭ Quick connection motor mounting plate. Included in both drill rigs DR 250 TV and DR 350 T		✓		1	1	4932399733	4002395363841
⑮ Water collection ring: For universal use with diamond drilling tools. For use with max. Ø 152 mm core bits	✓	✓	✓	1	1	4932478073	4058546340063
⑯ Guide rod for DD3-152. Requires SDS-plus pilot drill (Ø 8 x 110 mm)	✓	✓	✓	1	1	4932352679	4002395373376

System accessories - Wall chasers

AUDD blade is a perfect solution for 80% of wall chaser applications.
- 30% less loading on the machine compared to the MILWAUKEE® DU blade.
- 40% higher speed of cut compared to the MILWAUKEE® DU blade.

Bandsaws - System attachments

Bandsaw covers

Safety - Protects user from injuries by preventing any access to the blade
Jobsite Armor™ durability - Proprietary composite material and crush zone barriers absorb impacts and protect the tool
Protection from debris - Covers protect the blade track and the pulley wheels from debris entering the tool and affecting overall performance
Tool-free installation and removal within second
Extends life of blade by protecting it from external objects

Hydraulic oil

1 Liter accessory oil for M18™ FORCE LOGIC™ HUP700 hydraulic pump
Ensures full performance and reliable use in extreme environmental conditions from -18°C to 50°C

Description	Pack quantity	Min. order quantity	Article Number	EAN Code			
Replacement oil M18 HUP700	1	1	4932472004	4058546324001	<price	<price	<price

Bucket hanger

Compatible with M18™ FORCE LOGIC™ hydraulic pump
Extendable bar & rubber bumpers allow for use with most existing buckets & steel baskets
Symmetrical lift ring design enable use from both sides of the hanger
Keeps pump in ideal, level operating position while freeing up space inside the bucket
Standard size lift rings allow for use with existing bucket hooks
Open frame design enables the user to open the pump battery door while still resting in the hanger

Description	Pack quantity	Min. order quantity	Article Number	EAN Code

Pipe threader dies

High performance threader dies ensure perfect threads and long lasting performance in combination with the MILWAUKEE® threaders

Dies are available in two types of thread geometries: BSPT (British Standard Pipe Taper) and NPT (National Taper Pipe)

Dies are available in two diferent grades: Alloy dies for long lasting performance on black and galvanised pipes and HS dies for best performance on stainless steel pipes

One set contains 4 single cutting dies that are needed to equip one die head

MILWAUKEE® ONE-KEY™ Bluetooth® tracking tag - BTT

Track with any item in your MILWAUKEE® ONE-KEY™ inventory. Simply pair the TICK™ with your chosen item and leverage ONE-KEY™ integrated tool tracking to locate your missing product
Fully compatible with all ONE-KEY™ integrated tool tracking and inventory management features
IP68 - withstands toughest jobsite conditions
Withstands temperatures from +60 °C to -20 °C
3-year run time with built-in non-replaceable battery, eliminates the need to stock batteries
Identify a specific item or find an item, even if it cannot be visibly seen, with the new built-in speaker
Up to 90 m beacon range
5 seconds duty cycles
NFC allows you to pull data to troubleshoot
The QR code allows for 2 step activation, tracking when Bluetooth® isn't working and quickly identify specific item within the ONE-KEY™ software
The accelerometer will alert you if your item has been in use or is moved from where it belongs
Solid, one piece, construction makes for a stronger, more durable product

Hand Tools

Tape measures **STUD™ II**

- EXO 360™ blade technology delivers long lasting, rip and wear resistance.
- Strong magnet at start of the tape allows easy hooking onto flat surfaces and round pipe.
- Up to 4 m standout - higher standout for higher efficiency and higher reach.
- Anti-tear coating - reinforces the first 15 cm of the blade.
- 2 sided blade printing - increases the readability.
- Patented finger stop - protects fingers from blade retraction.
- ABS housing with impact resistant overmold for more comfort and jobsite durability.
- Wire form belt clip - reduces pocket tearing.
- Tool lanyard hole - Ready for quick and easy tethering.
- Class II accuracy.

Strong magnet

4M STANDOUT

Premium wide blade tape measures

- Up to 4 m standout - higher standout for higher efficiency and higher reach.
- Anti-tear coating - reinforces the first 15 cm of the blade.
- 2 sided blade printing - increases the readability.
- Impact resistant 5 points - reinforces the frame and makes it more durable.
- Patented finger stop - protects fingers from blade retraction.
- Wire form belt clip - reduces pocket tearing.
- Nylon bond blade protection - reduces tape tear.
- Tool lanyard hole - Ready for quick and easy tethering.

Tape measures pro compact

- Improved ergonomics and comfortable size.
- Jobsite durability.
- 5-point reinforced housing.
- 2G nylon coated blade protection.
- Improved tape tear and flexibility.
- Withstands 3 m drop test.
- Non magnetic.
- Heavier font on measurements for better readability.
- Smaller compact hook design.
- Back rest for easy vertical measuring.
- Improved belt clip: more pocket friendly.

LED Magnetic Tape Measure 7.5 m

NEW

- 100 Lumens LED light, to illuminate up to 3 m work area.
- Conveniently charge MILWAUKEE® Rechargeable internal battery with included micro-USB cable.
- Charging indicator red/ orange/ green to be able to read out the charging status of the battery.
- 2.5 hour of battery run time.
- 30 mm blade with double sided printing on tape for easier readability and architect scale provides easy calculating of scaled drawings.
- Improved standout up to 4.6 m.
- Finger stop for comfortable hold and finger protection when the blades retracts.
- Strong magnet at start of the tape allows easy hooking onto flat surfaces and round pipe.
- Overmold gripping area for extra comfort and durability.
- Anti-tear coating - reinforces the first 15 cm of the blade.
- Nylon non-reflective bond blade protection, up to 10x more resistant to jobsite damage.
- Class II accuracy.

Long open tapes

- Steel blade design with nylon clad (extra thick nylon coating) for increased durability.
- Best in class stretch performance: up to 50% less stretch vs. fibreglass tapes.
- Ultra durable design: reinforced metal handle and drop durability.
- 3:1 clutched planetary gearing for 10x longer gear durability and smooth rewind.
- GRIME GUARD: debris wiper keeps blade clean and clear of abrasive material.
- Class II accuracy.
- 2 sided scale printing. Metric measurements shown on the top side and imperial (inches and feet) on the underside of the blade.

INKZALL™ liquid paint markers

- Valve action marker.
- Durable acrylic nib for the most demanding environmental conditions: surface temperature from -10° up to + 145°.
- Marks on dark surfaces where traditional markers would not be easily visible.
- Can be used on rough, dirty and greasy surfaces.
- For use on concrete, black pipe, aluminium, PVC, steel & stainless steel, rubber and tyres.
- 10 seconds dry time.
- Water and UV resistant markings.
- Permanent markers. Markings last up to 6 months.
- Metal barrel for construction site durability.
- Xylene-free paint.
- IMPORTANT: Shake the marker with the cap on. Remove the cap and carefully pump it up and down until ink flows into the nib.

Jobsite scissors

- Iron carbide cutting edge for maximum durability. Longer lifetime vs. stainless steel.
- Chrome plated blades for maximum rust protection.
- All metal core: Full metal handle construction to protect from drops and handle breakage.
- Bolt lock technology protects blades from loosening to ensure precise cutting.
- Large handle loops for use with gloves.
- Index finger groove for more comfort.
- Laser edged ruler markings on the blade allows to measure and cut in one go.
- Jobsite offset scissors with micro-serrated blades for maximum durability and better grip.
- Jobsite offset scissors with 60°-offset head allows to keep hand above cutting material.

Metal Aviation Snips

- Thumb and forefinger slots for increased comfort and less fatigue. Allows user to push through sheet metal with ease with less risk of cutting oneself.
- Serrated cutting edges prevent slippage when cutting.
- Less hand fatigue when cutting thicker materials. Design with compound leverage action.
- Torsion spring opens jaws automatically during cutting for faster cutting action and less fatigue work.
- Chrome plated rust protected forged blades for increased lifetime. Extra hardened to 65 HRC.
- Made from forged alloy steel for best durability – Cr Steel.
- One hand locking mechanism.
- Flush slimline design for non-snagging in material.
- Triple cutting direction identification – on the head, handle and by colour coded handle.
- Ergonomic and durable overmoulded grips add comfort and last longer.
- Aviation snips: For short, straight and shaped cuts. Ideal for narrow radius cuts and notch cuts.
- Offset snips: For long continuous straight or curved cuts. 45° offset keeps users hand away from the cutting material.
- Extra long aviation snips: For longer and straighter cuts in one go.

Constant swing copper tubing cutters

- Constant swing copper tubing cutters are engineered for straighter, cleaner cuts.
- 4 roller design delivers accurate cuts and prevents walking.
- Chrome rollers for added durability and extended performance provide best in class rust protection.
- Smooth adjustment mechanism.
- On-board reamer enables fast, easy deburring.
- A spare wheel is integrated in the knob.

VDE pliers

- VDE (DIN EN/IEC 60900) certified tools. Tested to 10,000 volts and guaranteed to 1,000 volts. Tested against cold to -40°.
- Steel blades are fully forged , hardened and tempered for best durability . Grey titanium surface finish is non reflective and ensures maximum corrossion resistance.
- Induction hardened cutting edges to cut even the hardest of materials.
- Precision machined joint for maximum power transmission with optimum leverage for easy and effortless work.
- Ergonomic grip with softgrip for comfortable handling and good grip.

1/2" drive universal joint

- Improved joint durability to withstand higher torque.
- Wobble drive to provide additional access and can also be used in the standard position when socket is fully inserted.
- Allows access to difficult angles that cannot be reached with a fixed ratchet and socket.
- Chrome finish for corrosion and rust resistance.
- Laser engraved size label for quick and easy identification.

**STAY SAFE.
STAY PRODUCTIVE.**

SAFETY. TAKEN SERIOUSLY.

By designing cordless tools without compromise, and creating a range of PPE designed around user needs, at **MILWAUKEE®**, we're making the jobsite safer and more productive every day.

Today, we're proud to boast over 215 Cordless Tools on our M18™ platform and over 95 Cordless Tools on our M12™ platform, eliminating trip hazards from the jobsite. We've redefined the light equipment market with the launch of our MX Fuel™ range, preventing the need for petrol on the jobsite with the launch of key tools including the 350mm Cut Off Saw, and Cordless Breaker.

Personal Protective Equipment has seen little innovation over the years, driving users to modify their gear to better meet their needs. By taking time to understand our users' needs, we have developed PPE from the ground up, enabling users to adapt to each job. This has paved the way for innovative solutions such as our new safety glasses that can be worn all day with lasting, fog-free lenses.

MILWAUKEE® is committed to creating innovative solutions that help users stay safe and stay productive on the jobsite.

Head Protection Standards

EN397: EN12492 HEAD PROTECTION

EN397 is a European standard that sets out the requirements for industrial safety helmets. The standard applies to helmets intended to provide protection against falling objects and other types of head impact in industrial settings.

The EN397 standard specifies a number of requirements that a helmet must meet to be considered suitable for industrial use. These requirements include:

1. Resistance to impact: The helmet must be able to withstand a specified level of impact energy without breaking or deforming.
2. Penetration resistance: The helmet must be able to resist the penetration of objects that may strike the head, such as nails, screws or sharp objects.
3. Shock absorption: The helmet must be designed to absorb the force of an impact and distribute it evenly across the head.
4. Retention system: The helmet must have a chin strap or other retention system to keep it securely on the head.
5. Field of vision: The helmet must provide an adequate field of vision for the wearer.
6. Resistance to flame: The helmet must not ignite or continue to burn after exposure to a flame.
7. Electrical insulation: The helmet must provide protection against electric shocks.

EN397 is one of the most widely recognized standards for industrial safety helmets in Europe and is often used as a basis for certification and testing by third-party organizations.

EN12492

EN12492 is a European standard that sets out the requirements for mountaineering helmets. The standard applies to helmets intended to provide protection against impacts, penetration, and lateral deformation for mountaineers, rock climbers, and other vertical activities.

The EN12492 standard specifies a number of requirements that a helmet must meet to be considered suitable for mountaineering use. These requirements include:

1. Resistance to impact: The helmet must be able to withstand a specified level of impact energy without breaking or deforming.
2. Penetration resistance: The helmet must be able to resist the penetration of objects that may strike the head, such as rocks or ice.
3. Retention system: The helmet must have a chin strap or other retention system to keep it securely on the head during an impact.
4. Lateral deformation: The helmet must be designed to prevent excessive lateral deformation during an impact, which can cause injury to the neck or brain.
5. Field of vision: The helmet must provide an adequate field of vision for the wearer.
6. Ventilation: The helmet must have sufficient ventilation to prevent overheating during physical activity.
7. Compatibility with other equipment: The helmet must be compatible with other equipment, such as goggles or headlamps.
8. Durability: The helmet must be designed to withstand normal wear and tear associated with mountaineering activities.

STANDARDS	FORCE TRANSMISSION (TOP)	PENETRATION (TOP)	FORCE TRANSMISSION (SIDE,FRONT, REAR)
EN397	49J  5KG 1M MAX FORCE: 5.000N	29J  3KG 1M	-
EN12492	100J  5KG 2M MAX FORCE: 10.000N	29J  3KG 1M	25J  5KG 0.5M MAX FORCE: 10.000N

To meet the EN12492 standard, a helmet must undergo a series of tests, including an impact test, a penetration test, and a retention system test. The helmet is also tested for lateral deformation, field of vision, and ventilation. EN12492 is one of the most widely recognized standards for mountaineering helmets in Europe and is often used as a basis for certification and testing by third-party organizations.

EN 50365

EN 50365 is the European standard for electrically insulating helmets used for electrical work up to 1,000 volts AC or 1,500 volts DC. It dictates the necessary design, material, and testing requirements to ensure the wearers safety. Compliance with this standard is crucial for protecting individuals working in electrical environments.

Milwaukee's BOLT 100 hard hat fully complies with EN 50365, and is certified for use up to 1000V A.C. and 1500V D.C. in both vented and unvented versions.

DISPOSABLE RESPIRATORS

EN 149:2001+A1:2009 - RESPIRATORY PROTECTIVE DEVICES - HALF MASK

APPLICATIONS	MATERIALS	FFP LEVEL

FFP1	FFP2	FFP3
80%	94%	99%

EN 149 provides requirements, and testing method for respiratory protective devices to protect against particles.

3 classes of protection:
FFP1 / FFP2 / FFP3
FFP = Filtering Facepieces

NR = Not Reusable

D = Dolomite
(protection included when D mentioned)

SAFETY GLASSES

EN 166:2001 PERSONAL EYE-PROTECTION

The EN 166 standard specifies requirement for personal eye-protectors, used to combat various hazards as encountered across numerous industries which are likely to damage the eye or impair vision. The EN 170 standard specifies requirements for ultraviolet filters, while EN 172 refers to the sun glare filtration for industrial use.

All Milwaukee safety glasses are certified according to EN 166, to guarantee the eye protection and the resistance to impact. The clear safety glasses are EN 170 certified, to offer an UV protection, even with clear lenses, while the tinted and polarised safety glasses are EN 172 certified to offer a solar protection, ideal for the jobsite and also during leisure time.

- 2C-1.2 MT 1FT CE
- 2 = EN 170 (UV filters standard)
- C = Unimpaired color (clear lenses)
- 1.2 = Protection level (1.2 is the lightest)
- MT = Milwaukee Tool
- 1 = Optical class (avoid dizziness)
- F = Impact resistance
(only F can apply to safety glasses, A & B are for safety goggles)
- T = Extreme temperatures resistance (-5° / +55°)
- K = Anti-scratch
- N = Anti-Fog
- CE = European Certification

Same frame marking for all 6 SKUs

- **MT 166 FT CE**
- MT = Milwaukee Tool
- 166 = Name of the EN standard
- F = Impact resistance
(only F can apply to safety glasses, A & B are for safety goggles)
- T = Extreme temperatures resistance (-5° / +55°)
- CE = European Certification

HEARING PROTECTION

Hearing protection is crucial on the jobsite to prevent hearing damage from excessive noise exposure. It maintains worker safety, concentration, and productivity. Prioritizing hearing protection safeguards workers' long-term hearing health from permanent damage that may occur and creates a safer work environment.

The EN 352 standard that all Milwaukee hearing protection products meet, provides workers with the protection they need to Stay Safe and Stay Productive on the jobsite.

EN 352-2:2020 HEARING PROTECTORS: EARPLUGS

The EN 352-2 standard regulates earplugs that are inserted directly into the ear canal. The standard ensures the earplugs are made with appropriate materials, designed for comfort and effectiveness, meet performance benchmarks, carry necessary markings, and provide clear instructions for users. Adhering to this standard promotes the safety and reliability of earplugs for protecting hearing in noisy environments.

When noise exceeds 85 dB on the jobsite, it is mandatory for employers to provide hearing protection that meets these requirements. All Milwaukee earplugs that are inserted into the ear canal fully meet the EN 352-2 standards and protect workers from long term damage.

Hearing protection is mandatory when noise exceeds 85 dB (upper action level).

SNR (Single Number Rating) = attenuation in dB

H/M/L = High-/ Medium-/ Low-frequency attenuation value

Noise – SNR = residual noise level

Higher SNR or H/M/L value = higher noise attenuation

EN 352-2:2020 HEARING PROTECTORS: EAR MUFFS

EN 352-3 is a standard for earmuffs designed to be mounted on protective helmets or head/face protection devices. The standard ensures compatibility, effectiveness, and safety by specifying materials, secure fit, noise reduction, compliance markings, and user instructions. Adhering to EN 352-3 guarantees reliable hearing and head/face protection in hazardous environments.

All Milwaukee ear muffs that are attached to protective hard hats/helmets fully meet the EN 352-3 standards.

HAND PROTECTION

EN 388:2016 PROTECTIVE GLOVES AGAINST MECHANICAL RISKS

The EN 388 standard specifies requirements, test methods, marking and information to be supplied for protective gloves against the mechanical risks of abrasion, blade cut, tear, puncture and, if applicable, impact.

The impact protection has to fully encompass the back of hand, including the fingers. This standard is intended to be used in conjunction with EN ISO 21420.

All Milwaukee hand protection solutions are certified according to both EN ISO 21420 and EN 388 standards, the rating given varies for each type of gloves. EN ISO 21420 is the European general requirement and test method standard for protective gloves.

	Rating
Abrasion	1-4
Cut (Coup Test)	1-5
Tear	1-4
Puncture	1-4
Cut (TDM-100 Test)	A-F
Impact Protection	P,F

HIGH VISIBILITY

EN ISO 20471:2013 HIGH VISIBILITY CLOTHING

The EN ISO 20471 standard specifies requirements for high visibility clothing to ensure it is capable of visually signalling the user's presence. High visibility clothing ensures the user can be seen in all light conditions and is divided into 3 performance classes depending on the requirements.

The Milwaukee high visibility vests are intended for multiple applications and are class 2 certified.

	Class 1	Class 2	Class 3
Reflective Tape	0.10 sqm	0.13 sqm	0.20 sqm
Fluorescent Material	0.14 sqm	0.50 sqm	0.80 sqm
Level of visibility	Lowest	Intermediate	Highest

KNEE PADS

Wearing knee protection on the jobsite is important for several reasons:

- Reduce the risk of knee injuries: Knee pads reduce the risk of knee injuries that occur from kneeling and crawling. This can help prevent long-term damage to the knees, such as joint pain, arthritis, and other knee-related conditions.
- Increase comfort and productivity: Knee protection helps to reduce the discomfort and fatigue that can occur from working on hard surfaces or kneeling for long periods.
- Meet safety regulations: In many industries and job sites, knee protection is required by law or industry standards to ensure worker safety. Wearing knee protection can help ensure compliance with these regulations and prevent penalties for non-compliance.

EN 14404:2004+A1:2010 KNEE PROTECTORS FOR WORK WHEN KNEELING

EN 14404

2

In Europe, the most commonly recognized knee protection standard for workers on job sites is EN 14404:2004+A1:2010. This standard specifies the requirements and test methods for knee protectors used in tasks where the user is frequently kneeling. The standard covers the design, construction, performance, and marking of knee protectors, and it is applicable to all types of knee protectors used in occupational environments, including those worn over or integrated into clothing. Knee pads are tested based on their impact absorption, pressure distribution of the entire surface and protection against penetration of sharp or pointy objects.

EN 14404:2004+A1:2010 is recognized throughout the European Union and is widely used by manufacturers, employers, and workers to ensure that knee protectors provide the necessary level of protection and performance for workers who kneel frequently as part of their job duties.

Type 1	Knee pads independent of other clothing, fastened around the legs
Type 2	Knee pads in foam or other padding, secured in pockets on the legs, or which is permanently attached to the pants.
Type 3	Knee pads not stuck to the body but placed in position as the user moves around.
Type 4	Knee pads, which is part of a unit with additional functions, such as the framework for support to stand up, or kneeling seat. Can be worn on the body, or be independent.

Protection Class 0	Flat floor surfaces
Protection Class 1	Flat or uneven floor surface. Protects against penetration by a force of at least (100 ± 5) N
Protection Class 2	Flat or uneven floor surfaces under severe conditions. Protects against penetration by a force of at least (250 ± 10) N

ADAPT TO YOUR JOBSITE

The new Milwaukee BOLT Helmets and Bolt Accessories allow each user to tailor their Head protection to best meet the demands of the jobsite.

Cut C Sleeves

- High stretch nylon material with 4-way stretch points to fit users' arms.
- Tapered design, wider on the bicep and tight on the wrist, to fit the natural arm form.
- Elastic band with non-slip dots on the bicep and stretch wrist cuff to keep the sleeves in place and prevent them from sagging.
- Breathable and lightweight material provides good dexterity and all-day comfort.
- Elastic thumb loop avoids pressure points when using gloves.
- Sun UV rays protection with UPF 50+ according to BS EN 13758-1:2002 +A1:2006 for the covered part of the arms.
- European Certified for cut protection: EN ISO 21420, EN388:2016 (2342C), UKCA.

MILWAUKEE HEATED GEAR RANGE

Powered by M12™ REDLITHIUM™ or REDLITHIUM™ USB battery technology, MILWAUKEE® Heated Work Gear distributes heat across core body areas. Durable carbon fibre heating elements maintain heat to reduce the need for bulky layers, while multiple heat settings allow the user to select the right amount of warmth for all weather conditions. Our range of heated work wear is fully machine washable and dryable for extended use.

*on a single battery charge (3.0 Ah) at low setting

**EXPLORE OUR RANGE
OF HEATED GEAR**

M12™ heated jacket - Black

- Heat on demand - sewn in carbon fibre heating wires, distribute heat to core body areas and to the front pockets
- Superior run time, up to 8 hours of heat on low level with a single battery charge of an M12™ REDLITHIUM™ 3.0 Ah battery pack
- Easy touch heat controller - 3 heat settings: High, Medium, Low
- TOUGHSHELL™ stretch 90% polyester and 10% spandex material to withstand harsh working conditions and deliver up to 5x longer life
- FREE FLEX™ mobility - additional material under the arms increases range of movement for working overhead
- New battery pocket design providing users multiple options for battery placement, allowing adaptability to the situation
- Improved slim fit design with extended back prevents heat loss and keeps the user warm

TORQUE LOCK™ Locking Pliers Set Foam Insert

- TORQUE LOCK™: Faster set up and easy release when clamping flat and round material. Extra force can be applied to the TORQUE LOCK™ screw for better and more secure grip. Can also be used for hanging / storage purposes.
- Hardened jaws: Better grip force on jobsite material.
- Rust protection: Chrome plated tool increases life by reducing corrosion.
- Lever release design: Traditional release lever for jobsite convenience.
- MAXBITE™ pliers have special jaw geometry for maximum grip.
